

Josh Reedy, MSOH, GSP is an industrial hygienist who performs industrial hygiene evaluations, such as indoor air quality assessments, noise monitoring and inhalation exposure assessments for various contaminants.

Prior to joining Safex in May 2024, Josh was an EHS&S Professional/Industrial Hygienist with Marathon Petroleum Corporation, in Findlay, Ohio, where he conducted respirator fit testing, noise mapping/monitoring, industrial hygiene sampling, gap assessments, and various industrial hygiene work at facilities across the US. Prior to working at MPC, Josh worked at HZW Environmental Consultants performing personal air monitoring for various chemical agents and noise monitoring in an industrial setting for clients in the steel industry. Josh also conducted asbestos surveys, and abatement oversight for residential, commercial, and industrial properties.

Josh received his Bachelor of Science in Public Health from The Ohio State University in May 2015. Throughout his undergraduate he worked for ODOT as an Environmental Site Assessment intern and helped review ESA reports. In 2023, Josh received his Master of Science in Occupational Health in Industrial Hygiene and his GSP designation from the University of Toledo. Josh plans on working towards obtaining his CSP/CIH in the future.
