

The Place for Experienced Safety Pros

Ready for the next step in your safety career? Enjoy the variety, flexibility and excitement of a consulting career at Safex, Central Ohio's premier health, safety and environmental firm.

Each day is exciting and unique. From working at industrial facilities to construction sites, you'll be able to use your knowledge to keep people safe and have a big impact. Safex offers paid professional development (e.g., become a CSP), mentorship opportunities, work life balance and supportive and fun teammates. Responsibilities include:

- Conducting construction site safety inspections
- Developing lockout tagout and confined space entry procedures
- Conducting qualitative and quantitative fit-testing in accordance with the OSHA standard
- Preparing written programs to meet individual regulatory standards and customer needs
- Providing onsite safety staff support for construction and manufacturing clients
- Developing and presenting toolbox talks and single subject training sessions
- Providing straightforward regulatory interpretations
- Building relationships with clients and increase service offerings with existing clients
- Participating in scheduled marketing programs and activities

Must have skills:

- An Associate's or Bachelor's degree in safety or related science field and three to six years of safety experience preferred OR seven years of safety experience
- Critical thinking and problem-solving ability
- Strong written and verbal communication skills
- Attention to detail
- Effective organizational and time management skills to balance multiple projects simultaneously
- Experience preparing written reports and programs
- Identifying hazards and proposing corrective actions in both industrial and construction environments
- Interacting one-on-one with workers and management to discuss potential hazards and corrective actions
- Eligible for CSP or OHST if not already

About Us: Safex is a growing health, safety and environmental (HSE) firm focused on keeping employees safe and on the job. In 30 years of business, we've established ourselves as the trusted HSE resource to hundreds of businesses in the Midwest and beyond. We consult with clients in all industries. That keeps our work varied and it helps our team grow and learn new things every day. [Learn about our values in this video.](#)

Why Safex?

- Diversity in work tasks: never the same day!
- Autonomy to schedule your own jobs and travel
